"Thank YOU, Stephanie. Working with you has expanded me in ways I never thought possible. You've helped me see and believe in and manifest the merest twinkling of imagination into reality. You've also been patient and persistent to ensure a break-through, and for all I am infinitely grateful!"

Hello, I'm Stephanie

Drawing on 27 years experience as a transformational coach, sustainability expert, impact strategist, attorney, activist, wellness rebel, and medicine woman, I hold space with an intentional and powerful guided process for groups and individuals to experience quantum shifts in their personal and professional lives. My mission as an Earthkeeper is to awaken consciousness on this planet so we can live in harmony with ourselves, each other and nature.

I feel deeply honored to serve the integration of my life's work for the evolution of business, humanity and the world. With a career spanning multiple industries, an eclectic mix of off the beaten path experience, and a list of letters next to my name, the most potent part of my training has been living in the wild and navigating many dark nights of the soul.

I know the unique challenges globe changers face personally and professionally. I quickly find the blindspots and connect the dots taking clients on a journey where they haven't gone before. It's my higher purpose to hold the space for yours and our greatest evolution. Raising the frequency on this planet, doing our inner work, expanding our powers of perception, healing and outgrowing old stories that no longer align with who we really are, and aligning our actions to create a new and intentional paradigm, is priority and key to activate our highest potential. If you are ready to transform at the deepest level and catalyze your work in the world to another level, or your organization is committed to positive impact and ready to take it to another level, connect with me to explore possibilities.
